EMDECS Fleet

Bringing
together
all the
moving parts
of your
enterprise

Our Leading Edge Software

EMDECS is cloud-based maintenance software for heavy-duty equipment combining fleet and repair shop management into one comprehensive package. We've built in everything you need to track assets, instantly see profit and loss, manage preventive maintenance, and reduce downtime for your fleet.

Fleet Solution

Maintaining a fleet of vehicles is a huge cost centre for any business. Reduce these costs with EMDECS by tracking cores and warranties, ensuring PM work is done on time, and even tracking which makes and models cost the most money. Take the guesswork out of controlling your fleet maintenance costs with EMDECS.

Proven Performance

- EMDECS has been battle tested by over 1,700 companies globally.
- EMDECS manages over 1.5 million active units and growing.
- EMDECS users have invoiced over \$500 million this year alone for maintenance and repair.

EMDECS Features

- PM Scheduling and Repair Work
- Inventory and Warranty Tracking
- Rental & Leasing Management
- VMRS Code-Based codes for Heavy-Duty Equipment

Equipment

- Mobile Repair Order (RO)
- Repair Order and Time Tracking
- Warranty & Core Management
- Reporting for Fleet Managers
- Inventory Control
- Preventive Maintenance (PM) Tracking
- Instantly See Profits & Loss

All of these features give you greater visibility into the operation of your fleet and help you manage and even reduce your operating costs – Only EMDECS can give you all of this with one low asset based price.

Anytime, anywhere, for all equipment

Secure cloud-based application that can be used from any PC or mobile device with an Internet connection.

Regardless of size of your company, or type of equipment you have, EMDECS is the solution for you.
